

Dalkia brings its Polish subsidiaries together under the brand banner

Dalkia, a subsidiary of the EDF group, is the leading provider of energy services in France. As part of its ongoing international growth strategy, the company has now brought its Polish subsidiaries DK Energy Polska, ZEC Katowice and Matex Controls under the brand umbrella.

Following on from its Russian subsidiary, Dalkia's Polish subsidiaries DK Energy Polska, ZEC Katowice and Matex Controls will now carry the Dalkia brand name.

Dalkia's business operations in France joined the EDF Group in July 2014 to develop energy services as a core component of the energy transition. Dalkia immediately began expanding in international markets, mainly in the UK, Poland, the United States and Russia. Dalkia is currently active in eight countries, in which it has acquired several companies that together employ around 2,800 people.

DK Energy Polska and the two companies it acquired now form a group comprising 430 employees in Poland with revenue of €50 million, offering a comprehensive range of energy services: managing and optimising heating and cooling networks, using local energy resources, promoting energy efficiency, providing services for buildings and industry, and delivering innovative digital solutions.

Acquired in 2015, ZEC operates, optimises and develops heating networks in the Katowice region. These networks are fuelled in part by mine gas from coal extraction operations. Matex Controls joined the group in late 2017. The company specialises in (engineering, construction and maintenance) services along with digital solutions to improve the energy efficiency of buildings and industry.

To support Dalkia Group's strategy and help it meet its international goals, DK Energy Polska, ZEC Katowice and Matex Controls will adopt the Dalkia brand on 19 September 2018.

"I am delighted to be able to fly the Dalkia flag in Poland, a country in which we have been operating for the past four years. We will continue to develop our business there to accelerate the sustainable energy performance of our Polish customers through our Polish subsidiaries DK Energy Polska, ZEC Katowice and Matex Controls. Our subsidiary TIRU is also expanding in Poland, where it will operate the first household waste incinerator in the Gdansk area," said Sylvie Jéhanno, Dalkia Chairwoman & CEO.

Dalkia: working with you to step up your sustainable energy performance

Dalkia is a subsidiary of the EDF Group and supports its customers in their energy transition through two core businesses: making the most of local renewables and unlocking energy savings. Dalkia rises to this challenge through solutions scaled to fit each building, city, municipality, region and industrial site, providing expertise that spans the entire energy chain, covering everything from energy supply and optimisation of consumption to operation and maintenance of installations
